### DETAILED ACTION

This is the First Office Action in response to the above identified patent application filed on April 20, 2006.

#### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “the spindle is coaxial with the pinion shaft (3)” (claim 5), “transmission pinion shaft (3) is connected with the spindle, and the connection being a slip free connection which is formed by one of positively locking the pinion shaft (3) to the spindle, and by frictionally connecting the pinion shaft (3) to the spindle” (claim 6), and “the pinion shaft (3) is mounted **over** a bearing housing (15)” (claim 7) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. In claims 7 and 9, the limitation "the pinion shaft (3) is mounted **over** a bearing housing (15)" is not fully understood because the Figure appears to show the pinion shaft being mounted inside the housing.

b. In claims 8 and 9, the limitation "beveled ball bearings" is not fully understood.

The Figure appears to illustrate the ball bearing as a radial ball bearing.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3656

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Eckstein (DE 34 03 360).

Eckstein discloses a machine tool transmission, for a spindle transmission, the transmission comprising a pinion shaft (7) for transferring force and torque directly to a spindle (1), the spindle being coaxial with the pinion shaft, the pinion shaft communicating with the spindle by one of a slip free positive locking connection and a frictional connection, the pinion shaft being mounted in a bearing housing in order to reduce an overall length of the transmission and the pinion shaft being mounted on beveled ball bearings (16, 17).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Joyce whose telephone number is (571) 272-7107. The examiner can normally be reached on Monday - Thursday 7:30-5:00.
